

The Children's Identification & Location Database Project

The CHILD ProjectSM

The Children's Identification & Location Database (CHILD) Project is a secure nationwide network and registry, maintained by the Nation's Missing Children Organization and National Center for Missing Adults – that will enable Sheriffs' Offices and social service agencies across the nation to locate and positively identify missing children and adults with iris biometric recognition technology.

The Child ProjectSM has been designed to help locate missing individuals through advanced iris biometric recognition technology by taking a simple high-speed digital photograph of the individual's irises.

If Your Child is Missing

Tips from the National Center for Missing and Exploited Children

If your child is missing from home, search the house checking closets, piles of laundry, in and under beds, inside old refrigerators—wherever a child may crawl or hide.

If you still cannot find your child, **immediately call your local law-enforcement agency.**

If your child disappears in a store, notify the store manager or security office. **Then immediately call your local law-enforcement agency.** Many stores have a Code Adam plan of action—if a child is missing in the store, employees immediately mobilize to look for the missing child.

When you call law enforcement, provide your child's name, date of birth, height, weight, and any other unique identifiers such as eyeglasses and braces. Tell them when you noticed that your child was missing and what clothing he or she was wearing.

Request that your child's name and identifying information be immediately entered into the National Crime Information Center (NCIC) Missing Person File.

After you have reported your child missing to law enforcement, call the Nation's Missing Children Organization at 1-800-690-FIND (1-800-690-3463) or the National Center for Missing and Exploited Children hotline at 1-800-THE-LOST (1-800-843-5678).
